Martin, here's straw-man that went out on Friday.

Sorry Laura...it went to Laurie Williams (I didn't notice that until just now). Not sure who she is, but maybe she'll have some good comments for us ☺

Hello All,

This is our first draft straw man plan for the post incident monitoring for Cement, Animas, and downstream sites. Please take a look and let me know if you have comments or changes. The purpose of this document is to lay out a starting point for input from R8 Programs, HQ

Programs,R6, R9, CO, NM, Southern Ute, Ute Mountain Ute, Navajo, and Utah.

This is due to Martin by close of business on Monday. So, if you can have your comments to me by noon of that day, it would be most appreciated.

A big thank you to Maggie, Karl, Dan, Wendy, Tina, Susan, Paula and others. Our charge was to have at least a good outline with some limited details and I think this is much more than expected.

Thank you all!

-Sandie
